

Fully-Funded PhD Opportunity in Experimental Soft Matter Physics: we are excited to announce the opportunity for a fully-funded, four-year PhD position in experimental soft matter physics, commencing in January 2024. The position will remain available until an appropriate candidate is selected. The successful candidate will be employed by the esteemed [Institute Jozef Stefan](#), Slovenia, a premier research institute encompassing a wide range of research disciplines.

As a PhD candidate, you will be enrolled for doctoral studies at the Faculty of Mathematics and Physics, University of Ljubljana, Slovenia. This institute Jozef Stefan, where the majority of your research will be carried out, is conveniently located adjacent to the university faculty.

We are seeking candidates with a master's degree (or equivalent) in Physics, Materials, or a related field. Applicants should have a passion for research with strong oral and written communication skills. Under the mentorship of Dr. V.S.R. Jampani from the Condensed Matter Physics Department at IJS, you will have the opportunity to advance your research skills. To learn more about Dr. Jampani's research works and publications, please visit <https://vsrjampani.com/>.

The successful candidate will undertake ground-breaking experimental research in interfacial soft matter. In addition, this position offers a unique opportunity to collaborate with the world-renowned soft matter theory and simulation group led by [Prof. Ravnik](#).

For further information about this position or any research-related inquiries, please contact vsrao.jampani@ijs.si.

The formal application should include the following documents:

- A cover letter outlining your interest in this PhD opportunity,
- A comprehensive CV,
- A copy of your master's thesis or a relevant published paper (if available),
- Two reference letters.

Please note that the remuneration will be in accordance with the Slovenian Young Researchers standard.

We look forward to reviewing your application sent to vsrao.jampani@ijs.si and the potential of welcoming you to our research team.

Best Regards,

Dr. V. S. R. Jampani
Principal investigator,
Condensed Matter Physics,
Jozef Stefan Institute,
1000, Ljubljana,
